**AMENDMENTS TO THE ABSTRACT**

Please replace the Abstract on page 20 with the following amended Abstract:

A ~~method for isolating~~ composition as a mixture of anthocyanins, bioflavonoids and phenolics isolated from an edible berry using adsorbent resins to separate sugar and acids from juice and then dried and a pre-dried pulp from a berry ~~which are regenerable for reuse~~ is described. The mixture with a consumable carrier is particularly useful in foods and as a dietary supplement or nutraceutical product.
